

In this episode:

The Geologic Column for Beginners (Part 2)

SUMMARY:

This week on *Let's Talk Creation*, Paul and Todd are continuing their discussion on the geologic column. Todd continues to play interviewer and works through questions regarding the arguments against the column, how the column is impacted by the Flood, and what all this means to young-earth creationists. They end only wanting more time to discuss this extensive topic but finding a good stopping point. Take some time and listen to the science podcast that's just for you.

*Show Notes

- 0:27 [Previous Episode Recap](#)
- 10:12 If you had an older chunk of rock on top of a younger chunk of rock; within the younger chunk does the column still work? (In relation to the discussion regarding George McCready Price from the previous episode)
- 13:02 Argument against the column: “Fossils don’t really occur in the order to the sediments”
- 13:30 [Seeming human footprints in the Paluxy Riverbed](#) in Glen Rose, TX

- 23:56 Did the Flood cause the geologic column?
- 27:40 [Kurt Wise](#)
 - [The Hydrothermal Biome: A Pre-Flood Environment](#)
 - [The Pre-Flood Floating Forest: A Study in Paleontological Pattern Recognition](#)
- 30:40 Most creationists agree that the Paleozoic and the Mesozoic were deposited during the Flood. What does this mean?
- 35:06 How does a creationist use the column without getting tangled up in radiometric dating and millions of years?
- 37:20 [The Principle of Superposition](#)
- 37:50 [Nicolas Steno](#) (1638-1686)
- 39:37 [Way-Up Structures](#)
- 42:06 [The Principle of Crosscutting Relationships](#)
- 49:10 Is there an order in the fossil record that mirrors the rock layers that needs an explanation?
- 51:11 [Kurt Wise](#)
 - Wise, K.P. n.d. First appearances of higher taxa: a preliminary study of order in the fossil record. Unpublished study.
 - Wise, K.P. n.d. Ecological zonation and the first appearances of higher taxa. Unpublished study.
- 58:27 Concluding thoughts
